INTRODUCTION

The Career Services Center of Philadelphia University is pleased to present its Senior Survey for the Class of 2009.

This survey includes students with graduation dates of August 2008, December 2008 and May 2009. Statistics are derived from a survey response pool of **330** from a total graduating class of **491** (representing a 67% response rate). Of the **330** responding graduates, **277 or 83%** have reported post-graduation employment or graduate school acceptance. Employment plans were reported by **197 or 60%** of graduates (down from 70% in 2008). Graduate school plans were reported by **80 or 24%** of graduates (up from 17% in 2008). The remaining **53 or 16%** indicated they were still seeking employment at the time of this report.

Factors that contribute to this success include the talents of our students, their high-quality academic preparation, faculty and alumni networks, recognition we attain from numerous regional and national employers, the provision of a comprehensive array of experiential education opportunities, career-development services and programs, and the effective job and graduate school searches conducted by our students (in response to the change in job search techniques needed for success in the difficult economic climate of 2009, the Career Services Center offered additional job search strategies workshops.) This success translates into a range of starting salaries from **\$22,000 to \$60,000** with a reported average salary of **\$38,046**. The average starting salary for 2009 represents a 4% increase in salaries over 2008 graduates.

The Career Services Center assists students with their career and professional development, offering opportunities to prepare for their internship & job search and connect with industry representatives. Programs, services and workshops available to students in the past academic year include:
