

What's your next move?

*Are you feeling **unsure** about the major you chose? If you are confident that you are in the right major, do you have an idea of **what career** you might want to pursue once you graduate?*

If you find yourself spending time thinking about these topics, please consider joining the Career Services Center as we introduce the ^{career}COMPASS to the class of 2013!

What is the ^{career}COMPASS?

The ^{career}COMPASS is a tool designed specifically for first year students and will help guide you through the following steps:

- For students who are unsure about their major, the COMPASS can help you to determine what majors and careers exist that will match well with your personal characteristics.*
- For students who are sure that they are in the right major, the COMPASS can help you to determine which career paths will match well with your personal characteristics.*
- For all students, the COMPASS will enhance your confidence so that you feel sure about the direction you are pursuing, especially as you ready yourself to gain experience in your industry by joining Student Professional Organizations or by obtaining an internship in semesters to come.*

If you are interested in receiving a ^{career}COMPASS, stay tuned for email invitations from Career Services, informing you about workshop offerings during the Fall semester.
