Resources for Community and Trauma Counseling

Paul J. Gutman Library: www.philau.edu/library
CTC Research Guide: libguides.philau.edu/ctc

How do I Connect Remotely?
Connect to our online resources through the library homepage, as if you were on campus. After entering your university network user id and password, you will be connected to the online resource.

Discovery Tool - Summon
Use this tool towards the center of the Library’s Homepage to search through the library’s catalog of books and videos, as well as many of the library’s databases all in one place. Records link out to full text of online books, chapters, and articles and provide call number information for the library’s print books.

Which Databases Should I Use?
Select any of the links from the Databases link on the Library’s Homepage or CTC Research Guide found at http://libguides.philau.edu/ctc, or it might be best to start with these:

- **PsycNET**: PsycINFO (an index) and PsycARTICLES (full-text articles). Covers psychology literature from the 1800s to the present, linking to full-text when available.

- **EBSCOhost**: click the HELP button of any EBSCO database to connect to tutorials and documentation to help you search more effectively and use the system features more fully.
  - **Academic Search Premier**: interdisciplinary in scope, includes over 600 psychology titles
  - **SocINDEX**: partial full-text, from sources in sociology and other allied fields

- **PubMed**: expanded MEDLINE from National Library of Medicine. Indexes over 2,000 journals; some with full-text. Use “Gutman Library” limit link on right of search results to get results which are all available free or through our library.

- **ProQuest**: also provides access to several databases that cover a variety of topics. Some you might find helpful are:
  - **Health & Medical Complete**
  - **Research Library**

- **Google Scholar**: multidisciplinary database of scholarly and professional papers, book chapters, patents, etc., and links to full-text. Use a Library website link to show Gutman Library full-text holdings. Use “Settings” to set up exporting of references to RefWorks.

Specialized Resources
- **Cochrane Library**: evidence-based medicine; full-text reviews, trials, and more.
- **Academic Video Online**: collection of video resources which are available to the Philadelphia University community. They include the general collection known as VAST, which has over 17,000 videos and collections on individual subjects including counseling and therapy.
- **Films On Demand**: is a streaming video platform providing access for all members of Philadelphia University to view outstanding academic video content through the Internet. Currently, our Films on
Demand subscription provides access to over 9000 films on the following subjects. The Psychology section contains over 1600 films.

**e-Journal Collections**
- **SpringerLink**: full-text for journals covering several disciplines: medicine, social sciences, behavioral science, and more. Interlibrary Loan can help you to obtain the full articles for items not available in full text electronically in SpringerLink.
- **Sage**: another publisher of social science journals which includes a Psychology and Counseling section.
- **HighwirePress**: a searchable collection of medically-oriented journals, hosted by Stanford University. It provides selected full-text access to certain of these journals, sometimes after 6-36 months have passed, sometimes immediately.

**How do I Obtain Full-text from a Citation?**
We have many partner libraries that supply us with interlibrary loans free of charge. Also, most of our databases have links that looks like the ones below to connect you to online full-text if available.

**Interlibrary Loan (ILL)**
Before placing an ILL request, check to insure the library does not hold the title you need either online or in print or microfilm/microfiche. To see if we have access to the title via search in **Journals by Title** for the title of the source publication by selecting this tab above the central library search box. If we do not own or have access to what you need, see our ILL page (a link under the “Services” menu), or place an ILL request at [http://libguides.philau.edu/ill](http://libguides.philau.edu/ill)

**What is RefWorks? How do I use RefWorks?**
RefWorks, found at [http://libguides.philau.edu/refworks](http://libguides.philau.edu/refworks), can help organize and manage citations to articles, books, and websites you find during your research. It allows you to automatically generate an APA-formatted references page from a list of your citations. Creating a RefWorks account is free. Check with a librarian if you are prompted for the Group Login Code, this should happen infrequently.

**Where Can I Find More Information?**
Librarians can help you via email, phone, or in person. Schedule individual or small-group consultations ahead of time to ensure librarian availability for in-depth help, like RefWorks training.
- **Stan Gorski**: GorskiS@PhilaU.edu (x2581)
- **Karen Albert**: AlbertK@PhilaU.edu (x2847)
- **Full Library Staff list**: [http://www.philau.edu/library/libstaff.html](http://www.philau.edu/library/libstaff.html)
- **Reference Desk**: x2848

**Tutorials**
Tutorials that demonstrate advanced searching features and capabilities of some systems can be found on our Tutorials page at [libguides.philau.edu/tutorials](http://libguides.philau.edu/tutorials). Information about using Thesaurus and Subject Browse features, setting up Search and Table of Contents Alerts, and more are demonstrated in these tutorials. See the “Health Sciences” tab for the most relevant help.
