PhilaU “Single Bullet” Exhibition Installed at Battleship New Jersey

PHILADELPHIA, April 13, 2015 -- Philadelphia University’s popular student-produced “Single Bullet” exhibition has voyaged across the Delaware River to its new home at the Battleship New Jersey museum on the Camden waterfront.

The transfer of “Single Bullet: Arlen Specter & The Warren Commission Investigation of the JFK Assassination” from PhilaU to the Battleship New Jersey was made possible by architectural studies alumnus Philip Borst ’97 and Scott Scungio, both principals at Scungio Borst and Associates, a construction management firm based in Camden.

“It was an honor for Scungio Borst & Associates to help in the relocation of the ‘Single Bullet’ exhibition,” Borst said at an April 9 preview event. “The exhibition’s new home really connects this amazing expression by Philadelphia University faculty and students of a historical event to a legendary landmark of the same period.”

“Single Bullet,” the inaugural exhibition of the Arlen Specter Center for Public Policy at Philadelphia University, debuted in November 2013 in the Paul J. Gutman Library to coincide with the 50th anniversary of President Kennedy’s assassination. It was a collaborative project by architecture, graphic design communication, and law and society students.

The interactive exhibition transports viewers back in time to the scene of the assassination on Nov. 22, 1963 to investigate the controversy over the Warren Commission finding that one shooter, Lee Harvey Oswald, was responsible for President Kennedy’s assassination.

A highlight of the exhibition is a full-scale model of the 1961 Lincoln limousine President Kennedy was riding in when he was shot during a presidential motorcade through Dealey Plaza in Dallas.

The exhibition will be on display at Battleship New Jersey through December 2017 during the museum’s normal hours of operation.

Philadelphia University, founded in 1884, is a private university with 3,700 students enrolled in more than 70 undergraduate and graduate programs. As the model for professional university education, the University, through its award-winning Nexus Learning approach, prepares

students to be leaders in their professions in an active, collaborative and real-world learning environment infused with the liberal arts. Philadelphia University includes the innovative Kanbar College of Design, Engineering and Commerce; the College of Architecture and the Built Environment; and the College of Science, Health and the Liberal Arts.
