

Environmental Stewardship

Direct Energy Business
proudly recognizes

Philadelphia University

for purchasing 4,233,950 Kilowatt Hours
of Renewable Energy Certificates
for Vintage Year(s) 2011, 2012, 2013, 2014

According to the EPA Greenhouse Gas Equivalencies Calculator, the same amount of electricity produced using conventional fuels, such as coal, emits a national average of 3,041 pounds of carbon dioxide, a key greenhouse gas. By purchasing RECs, your business is also investing in the U.S. economy and the development of new, renewable electricity generation technologies that could fuel businesses and consumers in the future.
