

CLEAN ENVIRONMENTS INDOORS AND OUTDOORS

It only makes sense that The Arthur Jackson Company, the oldest and largest privately-owned full-service building maintenance company, would be a leader in the evolving green movement.

Our innovative program for green cleaning coupled with our total facilities approach enhances our ability to help you reach your green goals.

Our green cleaning approach allows us to customize our program depending on the level of green that your facility desires to achieve. Our program goes well beyond cleaning products and procedures.

In an effort to achieve the best work environment our green cleaning program combines **Green** products with **Green** procedures and tools to ensure a safe and efficient work space for all those who occupy the space.

We use products from JohnsonDiversey that are Green Seal certified. They not only clean effectively but are safe for our employees and yours. Our Green chemicals combined with proper cleaning tools help to:

- **Reduce** airborne particulates;
- **Deliver** better indoor air quality;
- **Reduce** the use of water and chemicals; and
- **Improve** the safety of the facility

Our green cleaning program is designed to improve a building's environmental quality and sustainability while ensuring a clean and safe work environment for employees, visitors and maintenance staff.

GOING BEYOND CLEANING

What can our green cleaning program do for your company?

- **Improve** employee and occupant health and productivity;
- **Sustain** or improve organizational reputation and brand equity among employees, customers and the surrounding community; and
- **Provide** a new opportunity to market and differentiate from competitors.

LEED CERTIFICATION

The Arthur Jackson Company works closely with our manufacturers, suppliers and customers to meet and exceed the most stringent of LEED specifications.

Our green cleaning program will help you in achieving the points you will need to reach certification.

At The Arthur Jackson Company it's not about providing you with individual products, our goal is to provide you with a total cleaning solution with "green" as our first choice.
