Contact: Community Service Office,  
x2744 or [communityservice@PhilaU.edu](mailto:communityservice@PhilaU.edu)

## HATS OFF

- Industrial Design graduate Bob Lewin '07 recently received honorable mention for his RainDrop sprinkler in the *Eye for Why* competition as noted in the summer 2007 issue of *Innovation*, the quarterly design publication of The Industrial Designers Society of America. Utilizing the benefits of both oscillating and traveling sprinklers, Lewin's RainDrop helps to efficiently water lawns. Sponsored by Dyson, Inc., and the IDSA, *Eye for Why*, challenges industrial design students to think differently about everyday problems by focusing on function, a philosophy shared by James Dyson, inventor of the revolutionary line of vacuum cleaners bearing his name.

## SCRIPT/INE Exhibition: Call for Submissions Coming September 2007 The F.U.E.L. Gallery, 249 Arch St., Philadelphia

This exhibition, presented by student Skylar Tibbits '08, is devoted to demonstrating the possibilities of spatial investigations through the use and manipulation of computer programming languages.

To submit work and learn more about the exhibit, [CLICK HERE >>](#)

## RECYCLING TIP OF THE WEEK

According to environmental organization Greenpeace, taking your own bags to the grocery store can reduce waste caused by the disposal of plastic bags.

Use box above to search the contents of past issues.
